

Q1 2012

- Profit before tax: NOK 393 million (NOK 336 million)
- Profit after tax: NOK 316 million (NOK 265 million)
- Return on equity after tax: 12.9% (11.2%)
- Profit per share: NOK 1.58 (NOK 1.32)
- Net interest income: NOK 401 million (NOK 424 million)
- Net commission and other income: NOK 302 million (NOK 281 million)
- Net income from financial investments: NOK 202 million (NOK 128 million)
- Operating expenses: NOK 478 million (NOK 446 million)
- Impairment losses on loans: NOK 34 million (NOK 51 million)
- Total lending growth over the last 12 months: 10.3% (12.5%)
- Growth in deposits over past 12 months: 7.1 % (17.5 %)
- Core capital ratio: 10.5 % (10.2 %)Pure core capital cover: 8.2 % (8.8 %)

(Figures for Q1 2011 are shown in parentheses)

Profit

Group profit before tax was NOK 393 million for Q1 2012, compared to NOK 336 million for Q1 2011. Return on equity after tax was 12.9% (11.2%)

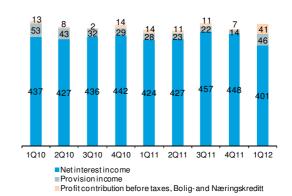

Net interest income was NOK 401 million for Q1 2012, compared to NOK 424 million for Q1 2011. Net commission and other income were NOK 281 million for Q1 2011, compared to NOK 302 million for Q1 2012. Net income from financial investments was NOK 202 million for Q1 2012, compared to NOK 128 million for Q1 2011. Operating costs were NOK 478 million for Q1 2012, compared to NOK 446 million for Q1 2011.

Impairment losses on loans totalled NOK 34 million in Q1 2012, compared with NOK 51 million in Q1 2011. High credit quality on the retail and corporate markets has contributed to continued moderate impairment losses on loans.

Net interest income

The group's net interest income in Q1 2012 amounted to NOK 401 million (NOK 424 million). Net interest income must be seen in relation to commission income and profit contributions from SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt. At the end of Q1 2012, the bank received commission on loan portfolios equivalent to NOK 48.9 billion (NOK 30.7 billion) from these companies. Commission income amounted to NOK 46 million (NOK 28 million) for Q1 2012, whilst profit contributions before tax were NOK 41 million (NOK 14 million). Year to date, net interest and commission income and profit contributions before tax increased by a total of NOK 22 million, compared with the same period last year.

The graph below shows quarterly trends in net interest income, commission income and profit contributions before tax in the credit businesses (NOK million).

Net commission and other income

Net commission and other income were NOK 302 million (NOK 281 million) for Q1 2012.

Net commission income was NOK 202 million (NOK 183 million) for Q1 2012. The increase on last year is mainly attributable to increased commission income from SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt. There were relatively small movements in other commission income from Q1 2011 to Q1 2012.

Other operating income amounted to NOK 100 million in Q1 2012 (NOK 98 million). This is mainly accounted for by income from estate agency.

Net income from financial investments

Net income from financial investment was NOK 202 million (NOK 128 million) for Q1 2012. NOK 68 million (NOK 17 million) of this amount was capital gains on securities and NOK 31 million (NOK 54 million) was capital gains on interest rate and currency trading. Furthermore, income from ownership interest was NOK 100 million (NOK 51 million) and dividends represented NOK 3 million (NOK 6 million).

Gains on securities of NOK 68 million for Q1 2012 are derived from a gain of NOK 15 million from the portfolio of shares and equity capital shares and a gain of NOK 54 million from the interest portfolio. The group is not directly nor indirectly exposed to European or US government debt.

Income from ownership interest of NOK 100 million (NOK 51 million) in Q1 2012 mainly includes profit shares from SpareBank 1 Gruppen, SpareBank 1 Boligkreditt, Bank 1 Oslo Akershus and BN Bank. The profit share from SpareBank 1 Gruppen was NOK 48 million (NOK 28 million) Q1 2012 (of which NOK 9 million derives from correction of the profits for 2011). The profit share in SpareBank 1 Boligkreditt comprised NOK 28 million (NOK 8 million), Bank 1 Oslo Akershus NOK 11 million (NOK 3 million), of which NOK 4 million derives from correction of the profits for 2011. The profit share in BN Bank was NOK 9 million (NOK 3 million), whilst NOK 2 million (NOK 7 million) was posted as a result of the difference between projected and posted equity capital.

Operating expenses

The group's operating expenses totalled NOK 478 million in Q1 2012. This represents an increase of NOK 32 million (7.2%) in relation to Q1 2011. Personnel costs increased by NOK 20 million (7.8%) to NOK 275 million, whilst other costs increased by NOK 12 million (6.3%) to NOK 203 million.

The increase in costs mainly lies in the parent bank, and is due to a combination of an increase in personnel in the Corporate Market Division and general rises in pay and costs.

The cost ratio for the group, measured as costs as a percentage of income, was 52.8% (53.5%) at the end of Q1 2012.

Credit risk and portfolio development

The market area is marked by a high level of activity and low unemployment. Along with continuous focus on risk management, this contributes to maintaining the good credit quality of the portfolio in line with overall group targets.

Credit quality in the corporate market portfolio is deemed to be good. Quality in the retail market portfolio is deemed to be very good, with trends influenced by stability where the low risk profile is maintained. Most of the portfolio is secured against a mortgage on real estate, and lending is overall moderate compared to security value. This implies that potential losses are limited as long as the values are not significantly impaired.

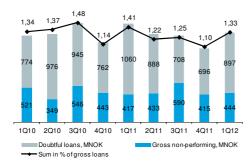

Impairment losses on loans and defaults

In Q1 2012, the group recorded net impairment losses on loans of NOK 34 million in Q1 2011 (NOK 51 million). This corresponds to impairment in percentage of gross lending of 0.13 (0.19). Group impairment was reduced by NOK 30 million (NOK 29 million) for Q1 2012.

Gross defaults on loans comprised NOK 444 million at the end of Q1 2012, compared to NOK 417 million at the end of Q1 2011. This corresponds to 0.44% (0.40%) of gross lending. Other problem commitments (not defaulted) comprised NOK 897 million (NOK 1,060 million). This corresponds to 0.89% of gross lending (1.01%). The total of defaulted loans and other problem commitments comprised NOK 1,341 million at the end of Q1 2012, compared to NOK 1,477 million at the end of Q1 2011. In terms of gross lending, this is a reduction over the past 12 months from 1.41% to 1.33%.

The degree of allocation for defaulted loans and other problem commitments was 27% (31%) and 39% (32%) respectively at the end of Q1 2012.

The following graph shows the development in gross non-performing loans and problem commitments, and the sum total of these as a percentage of gross loans.

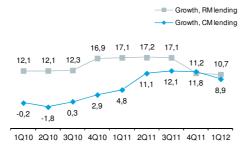

Loans to and deposits from customers

Gross lending comprised NOK 149.4 billion (NOK 135.4 billion) at the end of Q1 2012, and includes lending totalling NOK 48.9 billion (NOK 30.7 billion) in SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt. Gross lending growth over the last 12 months was 10.3% (12.5%). The group's retail market loans totalled 63.2% (62.5%) of the total loans at the end of Q1 2012.

The following graph shows trends in lending growth for the retail and corporate market divisions (growth was influenced by the group receiving approx. NOK 4 billion in lending through the merger with Kvinnherad Sparebank on 1 November 2010):

12 month lending growth (%)

Deposits from customers rose by 7.1% (17.5%) over the past 12 months to NOK 67.1 billion (NOK 62.7 billion). Deposits from the corporate market and public sector comprised 52.5% (53.9%) of group customer deposits at the end of Q1 2012.

In addition to ordinary customer deposits, the group had NOK 12.1 billion (NOK 12.9 billion) under management at the end of Q1 2012, primarily through SR-Forvaltning and ODIN funds.

At the end of Q1 2012, the deposit-to-loan ratio was 66.8% (59.8%). At the end of Q1 2012 the Financial Supervisory Authority of Norway's Funding Indicator 1 (which shows the ratio of illiquid assets financed by

debt with a duration of more than 1 year) was 110.0% (99.9%) for the parent bank and 106.4% (99.5%) on a consolidated basis.

Business areas

Retail Market Division

The contribution of the Retail Market Division before impairment on lending was NOK 200 million Q1 2012, compared to NOK 185 million year to date last year. The improvement is mainly due to growth in net interest income through increased lending and deposit volumes and low rise in costs.

Over the last 12 months, Retail Market Division deposits have increased by 11.3% and lending by 10.7%. This growth is the result of general market growth, a long-term focus on qualified advisory services and a strong brand name.

Customer growth continues for retail customers and small businesses, despite heavy competition. Net commissions (excluding income related to SpareBank 1 Boligkreditt) in Q1 2012 are lower than last year, as a result of no-fee payment services and lower stock market/management commissions at the start of the year.

Focus on broader provision of advice gives growth in product sales, especially within the savings and placings area. The broader focus will be strengthened further in future, in combination with focus on digital banking services.

Q1 2012 saw a calmer housing market at the start of the year. However, the level of activity grew in the latter part of the quarter. Impairments on lending and the proportion of non-performing loans continues to be low.

Corporate Market Division

The Corporate Market Division's contribution before impairment on lending was NOK 203 million Q1 2012. This is NOK 38 million higher than the same time last year. Cost growth due to an increase in personnel is more than offset by mainly higher contributions from deposits and lending.

Commercial activity is stable, but there is still fierce competition on the market. Over the past 12 months, the lending volume in the Division increased by 8.9% at the same time as deposits increased by 2.5%.

We are working actively with across-the-board sales of the group's products, and the product contribution is improving. Commissions and other income have increased by 16.9% over the last 12 months.

Net individual impairments of NOK 63 million were posted in Q1 2012, compared to NOK 32 million at the same point last year. The overall loss level for the division is under the long-term projected average. The underlying quality of the portfolio continued to be good, and the proportion of defaults is low.

Capital Market Division

SR-Markets had revenues of NOK 72 million (NOK 58 million) in Q1 2012. The majority of the revenues continue to come from customer transactions with interest and currency instruments. The Corporate Finance department placed its main focus on development of projects which will be completed in Q2 2012 or later.

The Division's areas of expertise are complementary to traditional banking operations, and the group's resources in securities activities and management.

The securities activities are organised under the SR-Markets brand and include own account and customer trading in interest rate instruments, foreign exchange and equities, and corporate finance services, as well as settlement and administrative securities services. Management is organised in a separate subsidiary, SR-Forvaltning AS.

Subsidiaries

EiendomsMegler 1 SR-Eiendom AS

Profit before tax will be NOK 14 million for Q1 2012, compared to NOK 12 million for Q1 2011. The improvement is mainly due to increase cost-effectiveness.

So far this year, the housing market has been influenced by a relative shortage of property for sale. In Bergen, Stavanger and Kristiansand, total turnover showed approx. 15% fewer transactions than for the same period last year. There is a shortage of property for sale in Bergen and Stavanger, whilst supply is higher than demand in Kristiansand.

In Q1 2012, the company handled 1,710 properties, a reduction of approx. 5% from Q1 last year. The flow of existing properties is satisfactory, whilst the flow of new build projects shows a reduction compared to last year, but is expected to grow.

Activity on the commercial property market is high, reflecting the level of activity within the oil-related business. There is good activity within the transaction market, and demand for modern office premises in Stavanger is good. The development for the management and operation of commercial buildings is also satisfactory, with an increasing supply of customers.

The strong market position was maintained in Q1 2012 and the company's total market share showed a weak increase.

SpareBank 1 SR-Finans AS

The company's principal activities are lease financing for corporate customers and secured car loans.

The company achieved pre-tax profit for Q1 2012 of NOK 26 million compared to a loss of NOK 18 million Q1 2011. The improvement is primarily due to taking an impairment on a loan in Q1 2011 of NOK 40 million, which was reversed in Q2 2011. Profit before impairment was NOK 27 million (NOK 24 million). Total assets showed a consistent increase over the last year, and at the end of Q1 2012 stood at NOK 5,556 million (NOK 4,974 million).

New sales in Q1 2012 show a positive trend within leasing and car loans. Total new sales were worth NOK 517 million (NOK 439 million), an increase of 18% on the same period last year. A satisfactory order reserve and low default level mean good prospects for 2012.

SR-Forvaltning AS

SR-Forvaltning is a securities business, with a concession for active funds management.

Profit before tax was NOK 5 million for Q1 2012, compared to NOK 6 million for Q1 2011. The company managed NOK 6,3 billion at the end of Q1 2012. This is an increase of around NOK 400 million from the level at the start of the year.

SR-Investering AS

SR-Investering is intended to contribute to long-term value creation, through investment in business in the group's market segment. The company invests in retail equity and companies in the SME segment that require capital for development and growth.

In Q1 2012, the profit before tax was NOK 2 million (NOK 15 million). At the end of Q1, SR-Investering had total investments of NOK 152 million and

residual commitments linked to the same of NOK 110 million

SpareBank 1 Boligkreditt AS and SpareBank 1 Næringskreditt AS

SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt have concessions as mortgage lenders, issuing bonds with preferential rights (OMF) in home loans and commercial property portfolios bought from the owning banks. The companies are owned by the savings banks that make up the SpareBank 1 Alliance, and they are helping to ensure that the owner banks have access to stable and long-term funding at competitive rates.

SpareBank 1 Boligkreditt had total lending volume at the end of Q1 2012 of NOK 140.4 billion, of which NOK 48.3 billion was home loans bought from SpareBank 1 SR-Bank. The bank has a holding in the company of 34.4%, updated annually in line with the volume sold at the end of the year.

SpareBank 1 Næringskreditt had total lending volume at the end of 2011 of NOK 9.0 billion, of which NOK 0.6 billion was home loans bought from SpareBank 1 SR-Bank. The bank owns a 30.7% share in the company.

Funding

The massive liquidity injects from the European Central Bank (ECB) have had a positive effect on the finance markets, causing a liquidity-driven rise. The fact that the EU reached agreement on a rescue fund of EUR 700 billion also helped improve market conditions. European bank shares, bonds with low credit rating, volatile currencies in developing countries and government bonds in the countries in crisis in southern Europe have all increased in value in Q1, after near collapse in the last two quarters of 2011.

However, there are signs that the upswing is in danger of slowing down. The stock markets have fallen after Q1, partly because of increased fears for the government's financial situation in Spain, lower growth in China and relatively weak employment figures in the USA. The interest on long-term Spanish and Italian government debt has risen strongly because of fears of deep cutbacks and tax increases which can lead to an even greater drop in BNP, this increasing government debt as a percentage of BNP.

In line with other banks, SpareBank 1 SR-Bank's borrowing costs for long-term financing have generally been at a high level in 2011 and 2012.

SpareBank 1 SR-Bank had good access to new financing during the quarter, and as with most of the major banks, continues to work on adapting to the new regulatory requirements by more cautious financing and increasing holdings of highly liquid assets. This process and the continuing high credit mark-up on the money markets can mean increased borrowing interest rates for bank customers in the future.

An important instrument for long-term funding is the issuance of covered bonds. The bonds are issued by the jointly-owned SpareBank 1 alliance companies, SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt, where they are given security against their portfolios of home and commercial property mortgages respectively. In the coming years, SpareBank 1 SR-Bank aims, therefore, to cover a major portion of its long-term funding needs through the issuance of covered bonds by the two mortgage companies.

The liquidity situation at the end of Q1 2012 was good. SpareBank 1 SR-Bank seeks to achieve an even maturity structure for funding and attaches importance to having a good relationship with a large number of Norwegian and international investors and banks. SpareBank 1 SR-Bank's liquidity buffer was NOK 19.7 billion at the end of the quarter. The level of the liquidity buffer ensures that the bank can maintain normal operation for 25 months without any external financing.

Conversion to an ordinary public limited company and founding of Sparebankstiftelsen SR-Bank were completed with effect from 1 January 2012. An important objective of conversion is to strengthen the group's access to equity, and long-term market financing.

Capital adequacy

At the end of Q1 2012, core capital adequacy for the group was 10.5% (10.2%) and capital adequacy was 11.0% (11.8%). Pure core capital adequacy (excluding Hybrid Tier 1 securities) was 8.2% (8.8%) for the group as at 31 March 2012.

In the autumn of 2009, the authorities resolved to postpone the final switch to IRB rules from 1 January 2010 to 1 January 2012. The Norwegian authorities later proposed that the transition rule on capital requirement for use of internal methods cannot be less than 80% of that according to Basel I ("the floor") should be continued until 2015. However, the authorities appointed a Nordic committee on 9 March

2012 to assess various aspects of Basel III/CRD IV and the imminent introduction of these rules into national law, including possible cooperation between the Nordic countries on implementation. All capital adequacy figures above allow for this transition rule.

SpareBank 1 SR-Bank has a solid financial status, and a leading position in the country's strongest growth area. The Board proposed on 7 February 2012 that equity should be strengthened through emissions up to NOK 1.63 billion. This proposed capital inflow will boost the group's ability to continue to meet the financing needs of customers offensively, and to adapt to the requirement for 9% pure core capital adequacy by 30 June 2012. There is also some regulatory uncertainty linked to a possibly higher capital requirement from the supervisory authorities up to final clarification implementation of Basel III/CRD IV. The proposed capital increase will help strengthen the group's solvency ahead of possible changes.

The increase in capital is proposed to consist of two emissions: 1) Public preferential rights emission of NOK 1.5 billion. A guarantee consortium has been established to ensure full subscription of the issue. The subscription period is set to 18 May 2012 - 1 June 2012. Allocation of shares will be performed 7 June 2012, and payment of allocated shares around 10 June 2012: 2) Targeted emission to group employees of up to NOK 100,000 per employee, equivalent to up to NOK 130 million.

The emissions will be performed in parallel, providing a final resolution is passed at an extraordinary annual general meeting on 9 May 2012.

The bank's shares

The conversion of SpareBank 1 SR-Bank from an equity capital bank to a public limited company (ASA) was performed with effect from 2012. The final registration date for ROGG was 30.12.2011. As from 2 January 2012, the ticker at the Oslo Stock Exchange will be changed to SRBANK.

Sparebankstiftelsen SR-Bank was founded as part of the conversion, and at the time of conversion received 72,176,308 shares. The number of shares corresponded to the breakdown of shareholders in the former primary capital represented in SpareBank 1 SR-Bank. The former owners of ROGG received 1 share as remuneration for each equity capital certificate they owned at the time of conversion. This

amounted to 127,313,361 shares. The total number of share issued after conversion was 199,489,669.

The share price for bank shares (SRBANK) was NOK 41.00 at the end of Q1 2012. This was an increase of 0.7% from the end of 2011. The main Oslo Stock Exchange index rose by 10.8% in the same period. Trading of SRBANK in Q1 2012 corresponded to 9.0% (3.0%) of all shares issued.

There were 12,198 (12,116) shareholders in SRBANK at the end of Q1 2012. The proportion owned by foreign companies and individuals was 5.5%, whilst 62.9% were resident in Rogaland, the Agder counties and Hordaland. The 20 biggest shareholders accounted for 59.1% of the shares at the end of Q1 2012. The bank's own shareholding comprised 270,988 shares. Group employees accounted for 2.2% of the shares at the end of Q1 2012.

The table below shows the 20 biggest shareholders as at 31 March 2012:

	Quantity	%

Accounting policies

SpareBank 1 SR-Bank prepares its parent company and consolidated accounts in accordance with the IFRS regulations. As at 31 March 2012, the IFRS consolidated accounts show a profit after tax of NOK 316 million and the IFRS parent company accounts show a profit after tax of NOK 212 million. Most of the items are treated identically in the parent

company and the consolidated accounts, but with one major difference. In the consolidated accounts subsidiaries are consolidated and associated companies are included in the accounts using the equity method of accounting. This is the same practice that was used earlier in both the parent company and consolidated accounts in accordance with NGAAP. Use of the equity capital method is not permitted in the IFRS company accounts. These ownership interests must be assessed at cost here. Dividends paid by the bank's subsidiaries and the SpareBank 1 Group and other associated companies are taken to income in the parent company accounts. It is the parent company's profit as at 31 December 2012 that is the point of departure for allocation of the profit.

Reference is made to note 1 for a description of the accounting principles applied in the parent company and consolidated accounts. The same accounting principles are applied in the quarterly and the annual accounts.

Outlook

The uncertainty concerning the debt situation in a number of the Eurozone countries increased during the summer of 2011, and influenced the financial markets in the latter half of the year. The massive injections of liquidity from the European Central Bank (ECB) helped stabilise the markets in Q1 2012. At the start of Q2 2012, however, there was once again unrest on the international finance markets, because of record-high risk surcharges on Spanish government debt. Unrest in the European bank sector can permeate to Norway via the needs of the Norwegian bank sector to cover part of its financing requirements internationally. SpareBank 1 SR-Bank has good liquidity, and has already covered a large element of its financing requirements for 2012 in Q1.

If the region's commercial sector is hit to a greater degree than to date by continued international setbacks, it can contribute to reduced demand for credit in the future. Focus on effective management and diversified revenue flows from multiple product and service areas will, however, make the group less dependent on net interest revenues. The credit quality of the group's lending portfolios is deemed to be good, and defaults and impairments on loans is expected to be relatively low in the future.

The high price of oil, major new oil finds and increased home-building are expected to contribute to good activity in the country and region in the future, and form the basis of continued positive development for the region's commercial and population development with sustained low unemployment. The group has a solid financial status, and a leading position in the country's strongest growth area. The planned capital expansion in Q2 2012 will strengthen the group's continued ability to meet the financing needs of our customers offensively.

The cash and cash equivalents includes cash and claims on central banks, plus the share of the total of claims on credit institutions that pertains to placement solely in credit institutions. The cash flow statement shows cash provided and used by Sparebank 1 SR-Bank and Sparebank 1 SR-Bank Group.

Notes to the financial statements

(in MNOK)

Note 1 Accounting principles

1.1 Basis for preparation

The 1st quarter 2012 interim financial statements of Sparebank 1 SR-Bank ASA are for the three months ending 31 march 2012. They have been prepared in accordance with IAS 34 Interim Financial Reporting. The financial statements have been prepared in accordance with current IFRS standards and IFRIC interpretations. The group's accounting principles and calculation methods are essentially unchanged compared to the financial statements for 2011. The principles mentioned below should be viewed in context to the principles discussed in the financial statements for 2011.

1.2 Segment reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. Segment information is disclosed in a separate note.

1.3 Foreign currency transactions and balances

Foreign exchange gains and losses, resulting from the settlement of foreign currency transactions and the translation of monetary assets and liabilities denominated in foreign currencies at period-end exchange rates, are recognised in the income statement, except where hedge accounting is applied.

1.4 Tangible fixed assets

Tangible fixed assets comprise property, plant and equipment All property, plant and equipment is shown at cost less subsequent depreciation and impairment, except for land, which is shown at cost less impairment. Cost includes expenditure that is directly attributable to the acquisition of the items. Alternatively tangible fixed assets could have been valued at fair value. This would have given an estimated added value. Depreciation on assets is calculated using the straight-line method to allocate the cost of each asset to its residual value over its estimated useful life. Parts of buildings which are leased out, are classified as investment property, but are otherwise treated the same way as other tangible fixed assets.

1.5 Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired business at the date of acquisition. Goodwill on acquisitions of subsidiaries is included in intengible assets. Goodwill on acquisitions of associates is included in investments in associates. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Goodwill is allocated to cash-generating units for the purpose of impairment testing.

1.6 Securities

Securities consist of shares, ownership stakes, certificates and bonds. Shares and ownership stakes are recognised either at "fair value through profit and loss" or as "available for sale". Certificates and bonds are recognised either at "fair value through profit and loss" or as categories recognised at amortised cost i.e. "held to maturity" or "loans and receivables". All gains and losses arising from changes in the fair value of securities recognised at "fair value through profit and loss" are included in "Net gain/losses on financial instruments" in the statements. Unrealised gains and losses arising from changes in the fair value of securities classified as available-for-sale are recognised in equity. When securities classified as available for sale are sold or impaired, the accumulated fair value adjustments are included in the income statement as "Net gain/losses on financial instruments". Securities recognised as "held to maturity" or "loans and receivables" are measured at amortised cost using the effective interest method. Refer to item 1.8. for explanation of this method.

1.7 Interest income and expense

Interest income and expense are recognised in the income statement for all instruments measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of loans and deposits and of allocating the interest income or expense over the expected term to maturity. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument. Once a financial asset or a group of similar assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

1.8 Loans to customers

Fixed rate loans to customers are carried at fair value. Gains and losses from changes in fair value are included in the income statement. Other loans and advances are carried at amortised cost using the effective interest method.

Impairment of gross loans carried at amortised cost

The group assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event'), and that loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the assets carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the income statement.

Impairment of loans carried at fair value

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets carried at fair value is impaired. Impairment losses are included in the income statement in the period in which they arise.

1.9 Derivative financial instruments and hedge accounting

Derivatives comprise currency and interest rate instruments linked to structured products.

Derivatives are recognised at fair value in profit and loss unless they are earmarked as hedging instruments.

The Bank assesses and documents the efficiency of the hedging, both when the initial classification is made and on an ongoing basis. In the case of complete hedging both the hedging instrument and the hedged object are recognised at fair value and changes in these values compared to the opening balance are recorded in the income statement.

1.10 Pension obligations

Currently, Sparebank 1 SR-Bank has two types of pension schemes.

Defined benefits schemes

All Group companies have pension schemes linked to the Group's own pension fund. The agreements are secured through payments to the pension fund, and are determined by periodic calculations carried out by an actuary. A defined benefit plan is a pension scheme that entitles the insured to a defined future benefit on reaching refirement age, normally fixed by factors such as age, number of years of service and salary. The liability recorded in the balance sheet in respect of a defined benefit plan is the present value of the defined liability reduced by the fair value of pension assets. Independent actuaries calculate the liability relating to the defined benefit plan annually. The present value of future defined benefits is calculated by discounting future payments using the interest rate for Norwegian government bonds adjusted for differences in maturity dates.

With effect from 2005, IAS 19 allowed for recording actuarial gains and losses (estimate deviations) directly against equity. The Group has determined to apply this principle.

The defined benefits plan was closed for new members with effect from April 1th 2011.

Defined contribution schemes

In the case of defined contribution plans, the company pays a contribution to an insurance company. The company has no further payment obligations after the subscriptions have been paid. The subscriptions are recorded as a wage cost. Any pre-paid subscription is recorded as an asset (pension asset) to the extent that the subscription can be refunded or reduces future subscription payments.

1.11 Borrowing

Borrowings are recognised initially at fair value, being their issue proceeds net of transaction costs incurred. Borrowings are subsequently stated at amortised cost, any difference between proceeds net of transaction costs and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

1.12 Dividends

Dividends are recognised as equity in the period before they are approved by the bank's Supervisory Board.

1.13 Ownership in subsidiaries and associated companies

According to the IFRS regulations, ownership in subsidiaries and associated companies are valued at cost in the financial statement of the parent bank. In the consolidated financial statements they are accounted for using the equity method: we recognise our share of the profit in associated companies in our income statement, and subsidiaries are consolidated into the financial statements of the group.

1.14 Estimates

The preparation of consolidated financial statements, leads to management making estimates, evaluations and assumptions that affect the way the application of accounting principles and thus the reported amounts of assets, liabilities, revenues and expenses. Critical estimates and discalimers are described more detailed in note 4 in the financial statements 2011

1.15 Financial risk management

For a further reference to financial risk management please see note 3 in the financial statements 2011.

Note 9 Capital adequacy

New rules on capital adequacy were introduced in Norway from 1 January 2007; Basel II – the EU's new directive regarding capital adequacy.

SpareBank 1 SR-Bank got permission from Kredittilsynet to use internal rating methods (Internal Rating Based Approach) on credit risk from 1 January 2007.

This will make the statutory minimum-requirement regarding capital adequacy more risk-sensitive, and thus more in accordance with the risk in the underlying portfolios.

Using IRB demands high standards regarding organisation, competence, risk-models and risk-management systems. Interim regulations have been issued by the Financial Supervisory Authority of Norway, where IRB banks will not get the full effect of reduced regulatory capital requirements until further notice.

Note 12 Segment reporting

Næringskreditt

30.376

Management has assessed which segments are reportable based on the form of distribution, products and customers. The primary reporting format is based on the risk and return profile of the assets, and it is divided between the retail market (including self-employed people), the corporate market, the capital market and subsidiaries of considerable significance. The Bank's own investment activities are not a separate reportable segment and they appear under the item "Not alloc." together with activities that cannot be allocated to the retail market, corporate market, capital market or subisidiaries of considerable significance.

Note 13 Reclassification of financial assets

Nominal value

Observable market value

Due to the extraordinary and negative development in the world's financial markets during 3rd quarter 2008 the IASB 13th October 2008 approved certain changes to IAS 39 and IFRS 7. The changes permit a reclassification of part of or the whole portfolio of financial assets held for trading retrospectively to 1st July 2008. SpareBank 1 SR-Bank has decided to adopt this opportunity and has, after due consideration, chosen to reclassify certain parts of the bond portfolio into categories recognised at amortised cost, i.e. "held to maturity" or "loans and receivables". No reclassifications have been adopted by any of the subsidiaries.

Listed instruments were classified as "held to maturity" while instruments with no observable market value and where the price has been recognised through alternative valuation methods according to IAS 39 were reclassified as "loans and receivables".

Reclassification was carried through due to the major and abnormal impairments that have arisen during the turbulent financial markets. A major part of the bank's bond portfolio has normally been kept in custody in Norges Bank and held to maturity. These bonds are normally of superior quality and exceptional changes in price is, according to the bank's opinion, disturbing the result unnecessarily. There is ability as well as will to keep the reclassified portolio until maturity.

The survey below states the effect a non-reclassification would have in the accounts.

As at 1.7.2008		Group		
		Amortising		
Certificates and bonds recognised as:	Book value	as interest	Reclass.effect	Fair value
At fair value through profit and loss	3.041	0	0	3.041
Held to maturity 1)	2.350	0	0	2.350
Receivables 1)	578	0	0	578
Total certificates and bonds	5.969	0	0	5.969

As at. 31.03.2012		Group		
		Amortising		
Certificates and bonds recognised as:	Book value	as interest	Reclass.effect	Fair value
At fair value through profit and loss	13.389	0	0	13.389
Held to maturity	538	0	2	540
Covered Bonds 2)	7.801	0	0	7.801
Accrued interests	89	0	0	89
Total certificates and bonds	21.817	0	2	21.819
		Group		
Bonds reclassified as receivable and hold to maturity		31.12.11	31.03.11	31.03.12

1) Net urealised losses written back as at 1st July 2008 amounts to NOK 47.3 million. The amounts will be amortised during the instruments economic life.

723

1.230

1.220

Weighted remaining economic life at the time of reclassification was approximately 2.7 years.

²⁾ Receiveables includes 7.801 million NOK of covered bonds used in the swap agreement with the Ministry of Finance.

Note 14 Pension

Sparebank 1 SR-Bank has two types of pension schemes - defined benefits schemes and defined contribution scheme. For further details on the calculation of the pension obligation and assumptions please refer to note 2 above or note 33 in the annual accounts 2011.

Contractual pension (AFP)

The law on State support to the AFP Scheme was passed on 19 February 2010.

The act had accounting effect for 2010 and for companies that publish interim accounts it was effective for the first quarter.

The manner in which the transition to the new AFP scheme is to be dealt with in the accounts appears in a Statement from the Norwegian Accounting Standards Board. The accounting consequences that follow this statement comply with the principles in IAS 19 and NRS 6. In the quarterly accounts SpareBank 1 SR-Bank have opted to follow the statement as regard the accounting consequences that the passing of the Act on State support to the AFP Scheme involves.

According to the statement the new AFP scheme is a benefit-based multi-corporate scheme that shall be accounted for in with the same principle as a benefit-based scheme. If there is not adequate information to account for the scheme in this manner, it must be accounted for as a defined contribution scheme. At the present moment SpareBank 1 SR-Bank have not been able to obtain sufficient information to make reliable calculations prior to publishing the accounts for Q1 2012, and for the time being the scheme has therefore been accounted for as a defined contribution scheme. When such calculations are made in the future, the AFP obligation must be recorded in the balance sheet as a benefit scheme.

Pension scheme

The Supervisory Board adopted changes to SpareBank 1 SR-Bank's current pension scheme on 24 March 2011.

As a consequence of this, pensions under payment from the defined benefit scheme will be expected to be adjusted lower than has been the practice in recent years. The pension adjustment assumptions have, therefore, been changed effective 31 March 2011.

The effect of the change in the assumptions concerning the pension adjustment that are included in the actuarial gains or losses and have been charged against equity is:

Parent bank		Estimate discrepancies Effect of change in assumptions concerning	Group
Q1 2011	186	pension adjustment	223
	186		223

No changes were made to the old-age pension cover in the remaining defined benefit scheme, and the following changes will otherwise be made:

- The spouse's/cohabitant's pension will be terminated. Paid-up policies are issued for pension rights earned up until 1 April 2011.
- Disability and children's pensions will continue, but no paid-up policy will be earned by the employees.
 The waiver of premium will continue for the new disability and children's pensions.

Employees who were members of the defined benefit scheme before the scheme closed on 1 April 2011 could voluntarily choose to convert to the defined contribution scheme up until 1 July 2011. 185 employees chose to convert to the defined contribution scheme.

In December 2011, the board of EiendomsMegler 1 SR-Eiendom AS adopted additional changes to the company's pension scheme. The board ruled that the company will switch to an obligatory defined-contribution pension plan during the first quarter of 2012.

Paid-up policies will be issued for pension rights earned up until 31 December 2011.

The effect of these changes were included in the estimated pension obligations for Q2 and Q4 2011.

The effect on profits recorded as a consequence of the reduction in the current pension scheme in 2011 was:

	Parent bank	Impact on profit	Group
Q2 2011	48	Settlement as per reduction	57
Q4 2011		Settlement as per reduction EiendomsMegler 1	
		SR-Eiendom	20
Q4 2011	137	Effect of settlement	147
	185	Change in pension obligation over profit and loss	224

Note 15 SpareBank 1 Boligkreditt AS

In the 3rd quarter of 2010, in association with the other owners of Sparebank 1 Boligkreditt, Sparebank 1 SR-Bank entered into an agreement to establish a liquidity facility for SpareBank 1 Boligkreditt. This implies that the banks undertake to buy mortgage bonds limited to a total value equal to 12 months' maturities in SpareBank 1 Boligkreditt. Each owner is primarily liable for its share of the need, secondarily for twice the amount of the primary liability under the same agreement. The bonds can be deposited with Norges Bank and represent, therefore, no significant increase in the bank's inherent risk.

Note 16 Events after the balance sheet date

The board of directors of SpareBank 1 SR-Bank ASA suggests to improve the equity with up to NOK 1,5 billion through a public rights issue of ordinary shares. The issue is garanteed by the largest share holders in the company and by companies in the SpareBank 1 Alliance.

In addition to the public right issue, the board of directors proposes a directed share issue to employees of the Group of up to NOK 100,000 per employee, equivalent to up to 130 MNOK. Proposed issue is to be decided at the Extraordinary General Meeting 9th May 2012.
