Outlook

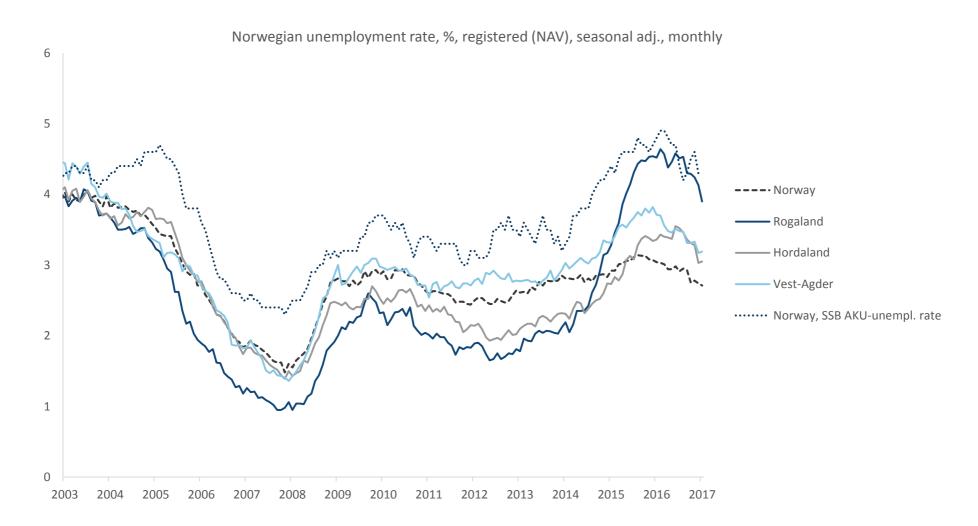

- Major infrastructure projects helps to ensure good conditions for the region's business and population growth, with moderate unemployment.
- Expectations concerning future market performance improved somewhat in the last months, but some uncertainty still exists about the group's market area.
- From record high levels, oil investments are reduced with approximately 16% in 2016, and continue decreasing with approximately 10% in 2017.
- Uncertainty about economic developments may dampen demand for loans, while low interest rates work in the opposite direction. We expect stable house prices going forward and still strong competition for new home mortgage customers.
- Declining unemployment in the group's market area combined with increasing sales of homes, especially in Rogaland, are contributing to greater optimism among the bank's retail and corporate customers.
- SpareBank 1 SR-Bank expects to make loan loss provisions at NOK 500 700 million in 2017.
- Solid earnings from a robust business model and capital efficiency indicates SpareBank 1 SR-Bank well positioned to build up the necessary capital going forward, while ensuring continued competitiveness and normalized dividend from 2018.
- An offensive approach for the future including investing in new technology and focus on accounting services and consulting.
