Quarterly presentation 2020

# Disclaimer

This presentation contains forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance.

Although SpareBank 1 SR-Bank believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of various factors.

Important factors that may cause such a difference for SpareBank 1 SR-Bank include, but are not limited to: (i) the macroeconomic development, (ii) change in the competitive climate, (iii) change in the regulatory environment and other government actions and (iv) change in interest rate and foreign exchange rate levels.

This presentation does not imply that SpareBank 1 SR-Bank has undertaken to revise these forward-looking statements, beyond what is required by applicable law or applicable stock exchange regulations if and when circumstances arise that will lead to changes compared to the date when these statements were provided.

# Measures implemented within credit

Changes are being implemented that will reduce the risk premium and help improve the group's robustness in order to give it financial leeway in the event of crises. In order to reduce unsystematic risk the group has decided to make the general changes described below.

	<b>Volatile industries</b>	Reduce exposure in volatile industries by introducing more restrictions related to industries.
---	----------------------------	--

<b>% KR</b>	<b>Large exposures</b>	Large exposures are a risk in themselves and both the maximum exposure limit and the permissible number of customers with exposure above a certain level will be reduced.
-----------------	------------------------	---

The number of personnel assigned to manage credit exposure within offshore in the corporate market division has been temporarily increased in order to deal with the Covid-19 situation and the fall in oil prices.

<b>!</b>	<b>Offshore</b>	Established a dedicated unit to handle the restructuring of offshore commitments.

\*\*High quality liquid assets divided by total net cash outflow in a 30-day, serious stress scenario.

# Solid capital ratio

- The EU's capital adequacy regulations (CRR/CRD IV) came into force on 31 December 2019. These entail, among other things, a reduction in the capital requirements for loans to small and medium-sized enterprises (SME) and the elimination of the so-called Basel I floor.
- The regulatory requirement is 12.7% after the countercyclical buffer was reduced from 2.5% to 1.0% in the first quarter of 2020. SpareBank 1 SR-Bank posted a CET 1 capital ratio of 18.3%.
- The systemic risk buffer will increase from 3.0% to 4.5% lifting the CET 1 requirement to 15.2% at 31 December 2020 incl. 1.0% management buffer.
- SpareBank 1 SR-Bank is not defined as a systemically important financial institution (SIFI).
- The leverage ratio was 7.8% as at 30 June 2020, well above the minimum requirement at 5.0%.

\*On 23 April 2020, the annual general meeting approved the board's proposal that no dividend be paid out for 2019. At the same meeting, the board was authorised to make a decision about the distribution of a dividend, at some later point in time, of up to NOK 5.50 per share based on the bank's approved annual financial statements for 2019. The authorisation remains valid until the next ordinary general meeting in 2021.

# Outlook

- Given both the low oil prices and the ongoing Covid-19 situation, uncertainty remains about how both the Norwegian and the global economy will develop, and the picture is changing continuously. In Norway, there has been a positive development in the last quarter.
- In the longer term, lower levels of investment and demand for loans are expected. The Norwegian state is particularly well-equipped to contribute financially and extensive measures aimed at both the private sector and business will mitigate the effects of the Covid-19 outbreak.
- Norges Bank has cut its policy rate by 1.50 percentage points in 2020 to 0.0% in May 2020. Such a large and rapid reduction in the policy rate has never been seen before in Norway. A stable policy rate is expected for the next year.
- The group's long-term target is a minimum return on equity of 12%, but as a consequence of the Covid-19 outbreak, return on equity in 2020 is estimated to be lower than the long-term target.
- The group's focus on digitalisation and automation, both internally and in relation to customers, has enabled almost all of the group's employees to work from home office recently. Customers have been looked after in an efficient and satisfactory manner.
- Given its solid financial position, the group is very well equipped to tackle crises and this will help to ensure that the SpareBank 1 SR-Bank Group remains a solid financial group after the Covid-19 outbreak ends as well.
- Geographic expansion, digitalization and growth will provide the basis for transforming from a regional savings bank to a bank for the whole of Southern Norway.

# Lower petroleum prices and increased uncertainty dampen 2020 activity

Still uncertain how much petroleum activity in 2020 will be affected by Covid-19, but it will probably fall somewhat

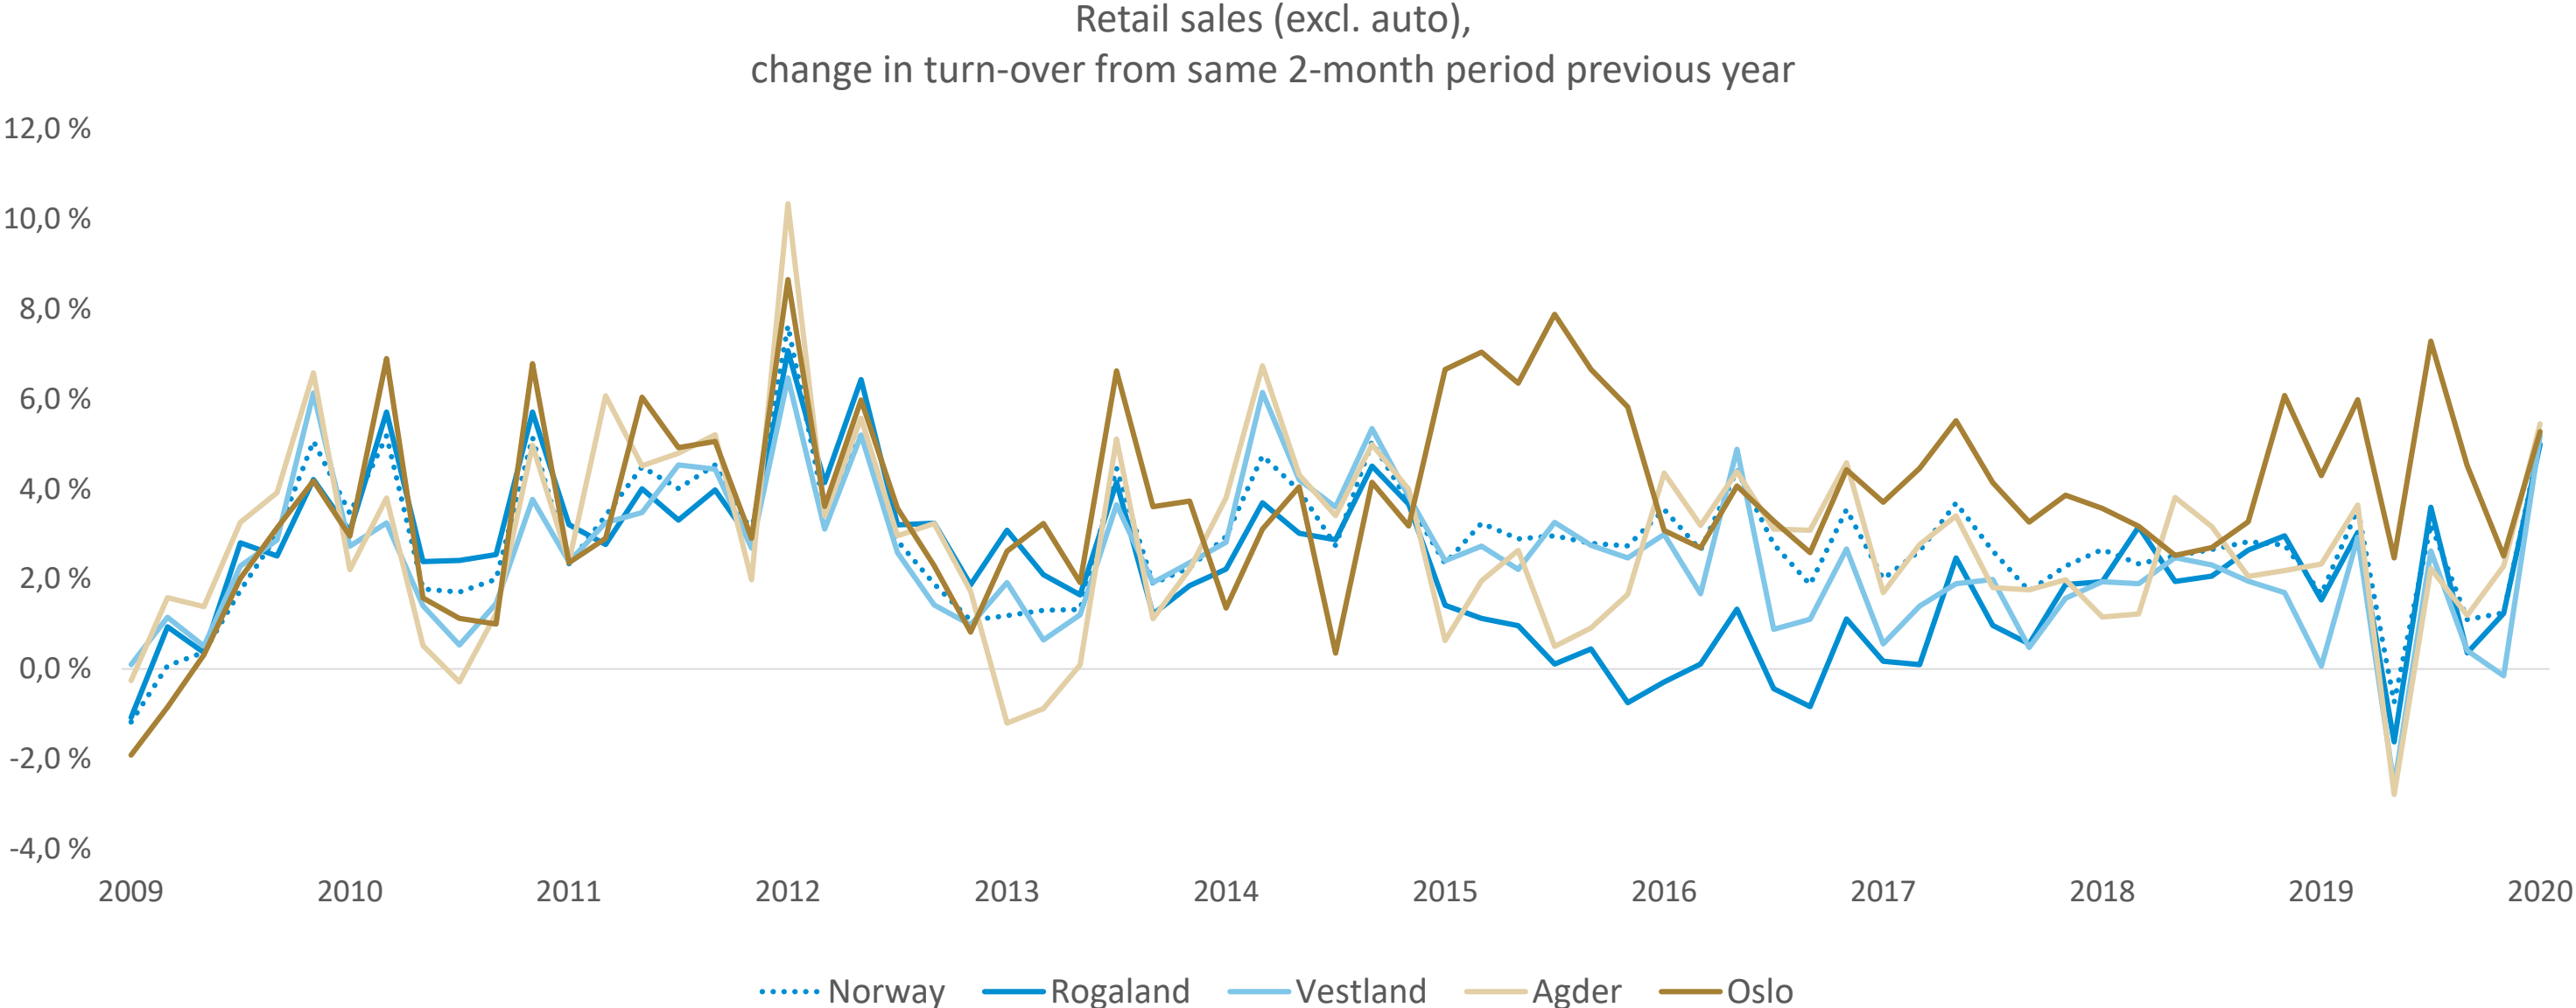

- Overall activity on the Norwegian Continental Shelf (NCS) had a marked increase for many years up to 2014. Activity increased over 60% from 2007 to 2014.
- Activity fell markedly in 2015 and 2016 and somewhat less in 2017. Thereafter, there was some upturn in 2018 and even more strongly in 2019.
- At the beginning of 2020, some increase in petroleum activity was expected in 2020. Covid-19 affects the outlook, but there is still considerable uncertainty about how much. Lower petroleum prices and increased uncertainty about the outlook dampen activity. At the same time, measures have been adopted in Norway to stimulate activity and this raises the prospect. Overall, there will probably be somewhat lower activity in 2020 than in 2019. The NPD expects a decline of 8% in 2020. Furthermore, the NPD expects a decline of 7% in 2021 and then more sideways development.

## APPENDIX

- 1) Macro
- 2) Loan portfolio
- 3) **Risk**
- 4) SpareBank 1 SR-Bank

**SpareBank 1 SR-Bank has a moderate risk profile in which no single event should be capable of seriously harming the bank's financial position**

- The core purpose of the banking industry is to create value by assuming deliberate and acceptable risk
  - SpareBank 1 SR-Bank therefore invests significant resources in developing risk management systems, processes and expertise that are in line with leading international practice
- The bank's primary market areas are South of Norway
  - The bank's primary market areas for credit exposure are Rogaland, Agder, Vestland as well as Oslo and Viken
- The bank's set clear requirements for loan activities in the corporate market
  - The activities that are financed must have a long-term perspective
  - The group must be very familiar with the ownership and management of the company
  - All financing decisions are based on the customer's debt-servicing capacity and a lack of debt-servicing capacity may not be compensated for through higher security
  - Shipping and offshore related financing (including significant parts of oil-related activities) are handled by centralized expertise

- The bank sets specific limits for the size of commitments as well as requirements concerning industry diversification
  - The maximum total exposure to an individual customer must be significantly lower than the regulatory requirements
  - The maximum unsecured exposure to an individual customer must not be so great that the potential loss cannot be absorbed without the group's financial position being significantly affected
  - This requires a diversified portfolio. The exposure to specific industries is subject to specific limits
- The bank sets special requirements for all property financing
  - Self-financing requirements apply for all types of property financing - in relation to both residential and commercial property
  - Advanced sales requirements also apply for financing housing development projects
  - In addition to this, requirements that limit loan size/rent income ratio apply for financing commercial property

# Risk profile of the loan portfolio

- SpareBank 1 SR-Bank has a solid loan portfolio. Portfolio quality improved last year.
- The loan portfolio consists mainly of small and medium-sized loans.

*\*Probability of default (PD) through a full cycle of loss.*

*The figures include the loan portfolio in the covered bond companies (SB1 Boligkreditt AS and SR-Boligkreditt AS).*

# Risk profile – Lending to the retail and corporate market

Retail market portfolio distributed by risk class

Corporate lending portfolio distributed by risk class

- The quality of the retail market portfolio is considered to be good and has low potential losses.
- The low risk profile is achieved through prudent customer selection and requirements for moderate LTV. Most of the portfolio is secured against a mortgage on real estate, and lending is overall moderate compared to asset value.

- The quality of the corporate market portfolio is good. Portfolio quality improved last year.
- There is a clearly defined framework that sets limit on what is funded and conditions for particular funding purposes. This ensures a robust portfolio.

*\*Probability of default (PD) through a full cycle of loss.*

*The figures include the loan portfolio in the covered bond companies (SB1 Boligkreditt AS and SR-Boligkreditt AS).*
