

## Alternative Performance Measures (APMs)

SpareBank 1 SR-Bank presents alternative performance measures (APMs), which provide useful, supplementary information to the financial statements. The measures are not defined in IFRS (International Financial Reporting Standards) and are not necessarily directly comparable with other companies' performance measures. APMs are included in our reports to provide insight and understanding of the group's performance and represent important target figures for how the executive management team manages the companies and activities in the group. APMs are not intended to replace or overshadow accounting figures. Key figures that are regulated by IFRS or other legislation are not regarded as APMs. The same applies to non-financial information. SpareBank 1 SR-Bank's APMs are presented in the overviews main figures and results from the interim accounts, as well as in the board of directors' report. All APMs are presented with corresponding figures. The APMs listed below have generally been used consistently over time.

Alternative performance measures in SpareBank 1 SR-Bank with definitions:	Explanations and definitions
<b>Profitability</b>	
Return on equity	Return on equity provides relevant information about the group's profitability by measuring its ability to generate profitability from the shareholders' investment. Return on equity is one of the group's most important financial target figures and is calculated as the ordinary result available to shareholders for the period as a percentage of average equity, less hybrid capital (hybrid tier 1 capital) classified as equity.
Cost/income ratio	Provides information about the correlation between income and costs. Calculated as total operating costs divided by total income.
Average interest margin	Measures the group's average profit from loans and deposits, calculated as net interest income as a percentage of average total assets.
Lending margin corporate market and retail market, including loans sold to SpareBank 1 Boligkreditt (SB1 BK) and SpareBank 1 Næringskredit (SB1 NK)	The lending margin provides information about the group's net interest income by measuring the interest margin relative to the 3-month money market rate. The group uses mortgage companies as a source of funding and the lending margins are included in commissions on loans sold to SB1 BK and SB1 NK, since this best reflects the group's income from total lending. The lending margin is calculated as net interest income on loans, including commissions from SB1 BK and SB1 NK, less interest costs equivalent to the 3-month money market rate, divided by the average lending for the period, including loans to SB1 BK and SB1 NK.
Deposit margin corporate market and retail market	The deposit margin provides information about the group's net interest income by measuring the interest rate margin relative to the 3-month money market rate. The deposit margin is calculated as net interest cost on deposits, adjusted for interest income equivalent to the 3-month money market rate, divided by average deposits for the period.
<b>Balance sheet figures</b>	
Gross lending growth over the past 12 months	Information about the activity and growth in the group's lending activities. This key figure is calculated as gross loans at the end of the period less gross loans at the start of the period, divided by gross loans at the start of the period.
Gross lending growth over the past 12 months, including SB1 BK and SB1 NK	Information about the activity and growth in the group's lending activities. The group uses the mortgage companies as sources of funding, and gross lending growth including loans sold to the mortgage companies reflects the activity and growth in lending activities better than would be case were these loans excluded. This key figure is calculated as gross loans, including loans sold to SB1 BK and SB1 NK, at the end of the period, less gross loans, including loans sold to SB1 BK and SB1 NK, at the start of the period, divided by gross loans, including loans sold to SB1 BK and SB1 NK, at the start of the period.
Growth in deposits over the last 12 months	Information about the activity and growth in the group's deposit business. This key figure is calculated as deposits from customers at the end of the period less deposits from customers at the start of the period, divided by deposits from customers at the start of the period.
Deposit-to-loan ratio	Provides relevant information about the group's liquidity and is calculated as deposits from customers divided by total loans to customers at the end of the period.
Deposit-to-loan ratio, including SB1 BK and SB1 NK	Provides relevant information about the group's liquidity, taking into account loans sold to SB1 BK and SB1 NK. Calculated as deposits from customers divided by total loans to customers, including loans sold to SB1 BK and SB1 NK, at the end of the period.
<b>Impairments on loans and financial commitments and loans and financial commitments in Stage 2 and Stage 3</b>	
Impairment ratio	Recognised impairments on loans and financial commitments measured relative to gross loans. This is calculated as a function of gross loans and provides some information about how large a percentage of gross loans are subject to impairments. The figure is calculated as impairments on loans and financial commitments recognised in the period divided by average gross loans in the period. When information is provided about impairment percentages for periods of shorter than a full year, the recognised impairments are annualised.
Impairment ratio, incl. loans SB1 BK and SB1 NK	Recognised impairments on loans and financial commitments measured relative to gross loans, including loans sold to the mortgage companies. This is calculated as a function of gross loans, including loans sold to the mortgage companies, and provides some information about how large a percentage of gross loans are subject to impairments. The group uses mortgage companies as a source of funding, and impairments as a percentage of gross loans, including loans sold to the mortgage companies, reflects how large a proportion of gross loans, including loans to the mortgage companies, are subject to impairments better than would be case were these loans excluded. The figure is calculated as impairments on loans and financial commitments recognised in the period divided by average gross loans, including loans sold to SB1 BK and SB1 NK, in the period. When information is provided about impairment percentages for periods of shorter than a full year, the recognised impairments are annualised.
Loans and financial commitments in step 2 as % of gross loans and financial commitments	Provides relevant information about the bank's credit exposure. Calculated as loans and financial commitments in step 2 divided by gross loans and financial commitments at the end of the period. Loans and financial commitments in stage 2 are loans and financial commitments that have seen a significant rise in credit risk since initial recognition, but where there is no objective evidence of a loss event on the balance sheet date. Calculated from and including 2018 following the transition to IFRS 9.
Loans and financial commitments in step 2 as % of gross loans and financial commitments, including SB1 BK and SB1 NK	Provides relevant information about the bank's credit exposure. The group uses mortgage companies as a source of funding, and loans and financial commitments in stage 2 as a percentage of gross loans, including loans sold to the mortgage companies, reflect the group's credit exposure better than would be case were these loans excluded. Calculated as loans and financial commitments in step 2 divided by gross loans and financial commitments, including loans sold to SB1 BK and SB1 NK, at the end of the period. Loans and financial commitments in stage 2 are loans and financial commitments that have seen a significant rise in credit risk since initial recognition, but where there is no objective evidence of a loss event on the balance sheet date. Calculated from and including 2018 following the transition to IFRS 9.
Loans and financial commitments in step 3 as % of gross loans and financial commitments	Provides relevant information about the bank's credit exposure. Calculated as loans and financial commitments in step 3 divided by gross loans and financial commitments at the end of the period. Loans and financial commitments in stage 3 are loans and financial commitments that have seen a significant rise in credit risk since granting and where there is objective evidence of a loss event on the balance sheet date. Calculated from and including 2018 following the transition to IFRS 9.
Loans and financial commitments in step 3 as % of gross loans and financial commitments, including SB1 BK and SB1 NK	Provides relevant information about the bank's credit exposure. The group uses mortgage companies as a source of funding, and loans and financial commitments in stage 3 as a percentage of gross loans, including loans sold to the mortgage companies, reflect the group's credit exposure better than would be case were these loans excluded. Calculated as loans and financial commitments in step 3 divided by gross loans and financial commitments, including loans sold to SB1 BK and SB1 NK, at the end of the period. Loans and financial commitments in stage 3 are loans and financial commitments that have seen a significant rise in credit risk since granting and where there is objective evidence of a loss event on the balance sheet date. Calculated from and including 2018 following the transition to IFRS 9.
<b>SpareBank 1 SR-Bank share</b>	
Book equity per share (including dividend)	This key figure provides information about the value of the book equity per share and a basis for assessing the reasonableness of the share price. Calculated as equity at the end of the period divided by the number of shares.
Price/earnings per share	Earnings per share compared to the share price at the relevant time, which provides a basis for assessing the reasonableness of the share price. Calculated as the share price divided by the annualised earnings per share.
Price/book equity	The value of book equity per share compared with the share price at a given time. Provides a basis for assessing the reasonableness of the share price. Calculated as the share price divided by book equity per share (see the definition of this key figure above).
