SpareBank 1 SR-Bank ASA

Update to credit analysis

Summary

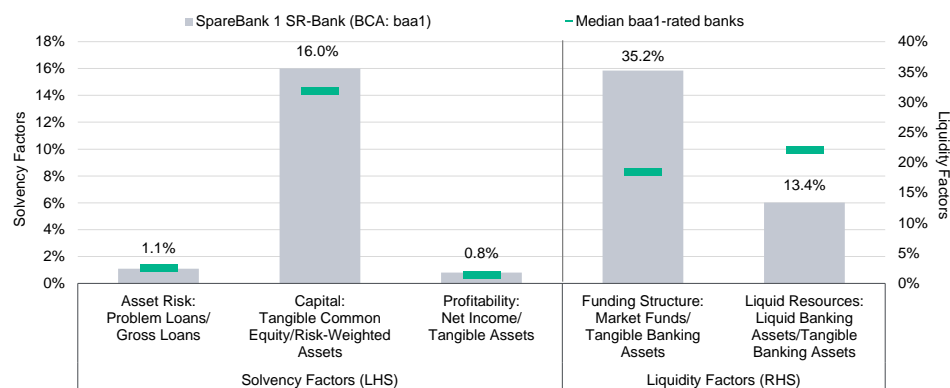

SpareBank 1 SR-Bank's long-term deposit and senior unsecured debt ratings of A1 take into account the bank's baseline credit assessment (BCA) of baa1, but also our loss given failure (LGF) analysis and government support assumptions which, together, result in three notches of rating uplift from its BCA.

SpareBank 1 SR-Bank's BCA of baa1 primarily reflects the bank's solid regional position, good capital buffers (Common Equity Tier 1 capital ratio of 14.7% at end-December 2018), resilient pre-provision income combined with lower credit impairments, and also its robust liquidity position. These strengths are balanced against the bank's limited geographic reach, which results in some credit-risk concentrations in more volatile sectors, such as oil/offshore and commercial real estate. Nonetheless, the bank maintains a sound overall asset quality with stage 3 loans to gross loans ratio (including financial commitments and loans sold to SpareBank1 Boligkreditt and SpareBank 1 Næringskreditt) of around 1.5% at end-December 2018.

The bank's BCA also reflects the resilient performance of the bank in recent years despite some challenges in certain oil-related exposures, as well as Moody's forward-looking expectation that the bank's asset quality, profitability and capitalization will remain robust in the currently improving operating environment in Norway. Concurrently, the BCA considers the bank's relatively high dependence on market funding, and more specifically on covered bonds, a common feature among Norwegian banks that leaves them vulnerable to changes in investor sentiment.

Exhibit 1

Rating Scorecard - Key financial ratios

Source: Moody's Financial Metrics

Credit strengths

- » Sparebank 1 SR-Bank's BCA is supported by its Very Strong- Macro Profile
- » A good capital buffer provides protection from current and future credit losses
- » Profitability supported by strong loan growth and lower credit losses
- » A robust liquidity position ensures a survival period of up to 20 months

Credit challenges

- » Exposures to the volatile oil-related and commercial real estate sectors pose risks to asset quality in a potential downturn
- » Geographical concentration in certain regions elevates the bank's credit profile, although the bank aims to expand further in Southern Norway
- » Reliance on market funding renders the bank vulnerable to fluctuations in investor sentiment

Outlook

SpareBank 1 SR-Bank's deposit and debt ratings carry a negative outlook to reflect the potential rating pressure from the upcoming implementation of BRRD in Norway, which will trigger a reassessment of our government support assumptions (please see [press release](#) for more details).

Factors that could lead to an upgrade

Upward rating momentum could develop if SpareBank 1 SR-Bank shows: (1) stabilisation of its asset quality trends, especially in the more volatile segments, such as oil/offshore and commercial real estate; (2) continued good access to capital markets and improved liquidity; and/or (3) strong earnings generation without an increase in its risk profile.

Factors that could lead to a downgrade

Future downward rating pressure would emerge if (1) Sparebank 1 SR-Bank's problem loans ratio increases significantly above our system-wide expectation of approximately 2%; (2) financing conditions become more difficult; (3) the bank's risk profile increases, for example as a result of increased exposures to more volatile sectors or if the quality of the oil-related portfolio deteriorates further; (4) the macroeconomic environment weakens more than currently anticipated, leading to a lower Macro Profile; (5) a reduction in the rating uplift as a result of our LGF analysis; and/or (6) the eventual passage of the official resolution law (BRRD) in Norway and revision of our government support assumptions, although the resulting rating impact could be neutralised by the MREL-eligible/loss-absorbing non-preferred senior (NPS) debt that the bank is likely to raise by 2022.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

Profile

SpareBank 1 SR-Bank is the leading financial group in Southern and Western Norway and the fifth-largest bank in Norway in terms of consolidated assets. The financial group provides a range of products and services, including traditional banking services such as loans, insurance and savings products, as well as securities trading, accounting services and estate agency services for retail as well as corporate customers. As of 31 December 2018, its adjusted consolidated total assets (including loans transferred to the covered bond companies of the SpareBank 1 Alliance) totalled NOK243 billion.

Detailed credit considerations

SpareBank 1 SR-Bank's BCA is supported by its Very Strong- Macro Profile

SpareBank 1 SR-Bank's operating environment is purely domestic and its Macro Profile is thus aligned with that of Norway, at [Very Strong-](#). Norwegian banks benefit from operating in a wealthy and developed country with very high economic, institutional and government financial strength as well as very low susceptibility to event risk. Norway has a diversified and growing economy, which demonstrated resilience to the past weakening in the oil sector. The main risks to the banking system stem from the high level of household indebtedness, elevated real estate prices and domestic banks' extensive use of market funding. However, these risks are mitigated by the strength of households' ability to service debt, banks' adequate capitalization and the relatively small size of the banking system compared with the total size of the economy.

A good capital buffer provides protection from current and future credit losses

SpareBank 1 SR-Bank's Common Equity Tier 1 (CET1) ratio of 14.7% at end-December 2018 down from 15.1% at end-December 2017 (see Exhibit 3), but above the regulatory requirement of 14%. We note that the FSA has assigned a revised Pillar 2 requirement of 1.7% to the bank applicable from 31 March 2019, from 2% previously. Accordingly, the bank's CET1 target was also revised to 14.6% for 2019, from 15% previously, including a management buffer of 0.9% above the regulatory requirement (13.7%). We also note that the countercyclical buffer will increase to 2.5% at the end of 2019, from 2% currently, which means that the bank will likely aim for a higher CET1 in 2020.

SpareBank 1 SR-Bank has managed to accumulate capital through increased profitability in the last few years, through conservative growth and modest dividend payout (dividend policy of around 50% of annual profit). Consequently, we believe that the bank is well

positioned and capitalised to continue developing its leading position in South-Western Norway, and expand further in the Oslo region based on its strategic direction.

Exhibit 3

SpareBank 1 SR-Bank CET1 development

Source: Company reports and presentations, Moody's Investors Service

The bank's Tangible Common Equity (TCE) has also been supported by good earnings generation and retained earnings, while the bank's Tier 1 capital ratio was 15.9% and the total capital adequacy ratio was 17.6% at end-December 2018. Such capital metrics compare favourably with other Nordic banks, as the transitional rules in Norway envisage that the minimum requirement for capital adequacy cannot amount to less than 80% of the corresponding amount calculated according to the Basel I rules.

However, we expect that this Basel I floor will likely be removed in Norway in the second half of 2019, combined with an introduction of a discount for SME exposures based on EU's CRD IV directive, for which the bank estimates will have a positive effect of around 130 basis points on its CET1 ratio. Moreover, the bank's leverage ratio was satisfactory at 7.7% at end-December 2018, up from 7.4% a year earlier, significantly higher than both international and Norwegian requirements.

We note that the FSA has recently [announced](#) a proposal to designate large regional banks with more than 10% corporate lending market share in one or more defined regions, as systemically important financial institutions (SIFI). Accordingly, SpareBank 1 SR-Bank would likely have an additional Common Equity Tier 1 (CET1) capital requirement of 2% of its risk-weighted assets (RWAs) and 1% in terms of its regulatory leverage ratio, should the proposal be accepted by the Ministry of Finance. However, the transposition of the CRD IV directive later this year as mentioned above, is expected to partly neutralise the bank's capital impact from a potential SIFI regulation.

Exposures to the volatile oil-related and commercial real estate sectors pose risks to asset quality in a potential downturn,...

We consider the SpareBank 1 SR-Bank's asset quality to be satisfactory, despite some deterioration in 2018 (see Exhibit 4) mainly due to the implementation of IFRS 9 in Norway and some challenges in the off-shore industry. Problem loans (or stage 3 loans classified under IFRS 9) accounted for 1.46% of gross loans (including covered bond loans) at end-December 2018, up from 1.13% for non-performing and impaired loans at end-December 2017. We note that the increase and the bulk of the bank's loan losses are largely affected by its exposure/commitments to the offshore/oil and gas sector. The Norwegian Petroleum Directorate expects an increase of 10% in oil investments in 2019 up from around 2% in 2018, which drives the improved economic activity in the region and further reduce the bank's asset risk.

Exhibit 4

SpareBank 1 SR-Bank's problem loans

*Note: 2018 numbers are Stage 3 gross loans under IFRS 9, while previous years are under IAS 39.

Source: Company reports and presentations, Moody's Investors Service

SpareBank 1 SR-Bank is one of Norwegian banks with a relatively high exposure to the oil & gas and shipping sectors, with related exposures (including oil services, oil and gas, and offshore shipping) at end-December 2018 comprising in total around 5.7% of its total gross loan book (including covered bond loans transferred to SpareBank 1 entities). However, the recent pick-up in oil prices is likely to contain the potential credit losses in these sectors, although we note that the bulk of the accumulated credit losses so far are linked to such exposures.

...while geographical concentration in certain regions elevates the bank's credit profile, although the bank aims to expand further in Southern Norway

In addition, the bank is also exposed to the commercial real estate sector (around 15.9% of gross loans at end-December 2018, including covered bond loans transferred to SpareBank 1 entities), a significant part of which is located in the county of Rogaland, where vacancy rates are vulnerable to oil prices and investments. This exposure combined with its sizeable mortgage loan book (around 60% of total gross loans), could leave the bank vulnerable to any unexpected material decrease in property prices, a feature shared with other Norwegian savings banks. However, we note that almost 90% of the bank's mortgage exposures have a loan-to-value (LTV) ratio of lower than 85%, which means that the bank can withstand certain decline house prices before its credit profile is impacted.

Our assigned Asset Risk Score reflects the challenges the bank could face in a possible distress in the oil-sector (similar to the one that unfolded in 2015-2016), taking into account the bank's relatively limited geographical diversification, certain concentration to vulnerable sectors, but also certain restructured loans that could bring about additional impairments. That said, we view positively the bank's recent opening of a branch in Oslo, aiming predominantly corporate clients, as part of its Southern Norway expansion strategy that will gradually improve its regional and sectoral diversification.

Profitability supported by strong loan growth and lower credit losses

SpareBank 1 SR-Bank's profitability in 2018 was supported by increased net interest income (9% during 2018) on the back of a robust loan growth of around 7.6% (including covered bond loans transferred to SpareBank 1 entities), cost containment, and lower loan losses. This has resulted in an increase in the bank's net profit by approximately 10% during 2018, with a return on equity (RoE) of 11.3% in 2018 from 11% in 2017 and compared to a long-term target of 12%.

The bank's loan losses decreased significantly in 2018 to NOK324 million compared to NOK543 million the previous year, reflecting the increasing optimism in the bank's home region due to higher oil prices. Accordingly, the bank's credit loss ratio declined to 0.17% in 2018 from 0.29% in 2017, despite the adoption of IFRS 9 with more conservative principles for write-downs from January 2018 onwards. We expect the bank's loan loss provisions to remain moderate and manageable for the bank in 2019, in view of the expected sustainability of oil prices.

Exhibit 5

SpareBank 1 SR-Bank's Cost of Risk and PPI evolution

Source: Company reports and presentations, Moody's Investors Service

The bank's net interest margin (NIM) was marginally higher at 1.54% in 2018 from 1.52% in 2017 as interest rates started to increase in Norway, while net commission income declined by 5.7% during 2018 due to lower commissions from the SpareBank 1 covered bond entities that the bank uses less than in the past. This commission income provides some diversification in the bank's total revenues, constituting around 26% of the total income in 2018. SR-Bank's cost efficiency remained favourable with one of the lowest cost-to-income ratios (40.9% in 2018 from 40.7% in 2017) among the large Norwegian Savings Banks. We note that the bank has ambitious plans in new technology and development in order to improve its product offering and customer experience, which to some degree exerts upward pressure on its IT-related expenses that are the second highest cost item after staff expenses.

Looking ahead, we expect the bank's pre-provision earnings to remain resilient in the next 12-18 months in view of the expected continued upturn in the Norwegian economy in 2019 that will support consumer consumption and increased business investments. We expect the bank to be able to meet its RoE target of 11.5% for 2019, in anticipation of also higher interest rates in 2019 that will likely support the bank's NIM. Nonetheless, our Profitability Score adjustment for SpareBank 1 SR-Bank reflects our expectation that the bank's oil-related exposure and restructured loans will continue to pose downside risks to the bank's bottom line, and that its earnings quality and diversification is limited and skewed towards retail mortgages.

Reliance on market funding renders it vulnerable to fluctuations in investor sentiment...

While SpareBank 1 SR-Bank benefits from solid access to domestic and international capital markets, with a stronger footing than its local peers, providing a good funding diversification, its reliance on wholesale funding remains high. Market funds accounted for around 35% of tangible banking assets (including assets transferred to covered bond companies) at end-December 2018 (ratio we use in our scorecard), which we believe renders the bank susceptible to potential shifts in investor sentiment.

SpareBank 1 SR-Bank also benefits from a good deposit base, which represented around 45% of total liabilities (including covered bonds issued through SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt) at end-December 2018, which has proven to be resilient and stable over many years. Deposits from customers increased by around 4% during 2018. Nonetheless, the bank's gross loans-to-deposits ratio, including transferred loans, was relatively high at around 203% at end-December 2018.

According to our methodology, we globally reflect the relative stability of covered bonds compared to unsecured market funding through a standard adjustment in our scorecard. Covered bonds have become an increasingly important source of funding for the bank, which issues covered bonds through the wholly owned covered bond company SR-Boligkreditt AS and specialised companies owned jointly with other members of the SpareBank 1 Alliance. Funding through the jointly owned covered bond companies [SpareBank 1 Boligkreditt](#) (residential mortgages) and SpareBank 1 Næringskreditt (commercial mortgages) is carried out off-balance-sheet, since the bank does not consolidate these entities.

At end-December 2018, the bank had transferred around NOK 8.9 billion to Sparebank 1 Boligkreditt and NOK 0.4 billion to SpareBank 1 Næringskreditt, or around 5% of its total loan book including transferred loans. In addition, in the second quarter of 2015 the bank

set up SR-Boligkreditt as a wholly owned covered bond company, to diversify and optimise its funding by gradually shifting its cover bond activity to this entity. While we view positively the diversification benefit of covered bond funding, extensive use of covered bond funding increases the amount of pledged assets unavailable for unsecured bondholders, including depositors in liquidation.

Our Funding Structure Score reflects our view that although SpareBank 1 SR-Bank has benefitted from strong access to domestic and international capital markets, its high reliance on market funding - a common feature of Nordic banks - is a material source of risk. We believe that in times of market stress, market funding can become more expensive and/or restricted.

...although a robust liquidity position ensures survival period of up to 20 months

A mitigating factor to the bank's reliance on market funds is its robust liquidity buffer, which stood at NOK30.4 billion or around 13% of total assets at end-December 2018 consisting mainly of cash, short-term repos, and covered bonds. This liquidity buffer could cover the bank's normal operations for at least 20 months, in the event of closed markets that would not allow the bank to refinance its maturing debt. In addition to the liquidity buffer, the bank has NOK24.4 billion in home mortgages ready to be transferred to a covered bond company, while it reported a commendable liquidity coverage ratio (LCR) of 167% at end-December 2018, combined with a net stable funding ratio (NSFR) of 121%.

However, our assigned Liquid Resources Score for the bank no longer incorporates a positive adjustment to reflect liquid assets held by the jointly-owned SpareBank 1 Boligkreditt and SpareBank 1 Næringskreditt, given the increasingly lower proportion of covered bonds channeled to these entities. The bank has now the bulk of its covered bonds carried out from its own covered bond entities, which are consolidated in its group financial statements.

Support and structural considerations

Loss Given Failure and additional notching

Norway will shortly implement the EU's Bank Recovery and Resolution Directive, which confirms our current assumptions regarding LGF analysis. For our resolution analysis, we assume residual tangible common equity of 3% and losses post-failure of 8% of tangible banking assets, a 25% run-off in "junior" wholesale deposits, a 5% run-off in preferred deposits, and assign a 25% probability to deposits being preferred to senior unsecured debt. These are in line with our standard assumptions.

For SpareBank 1 SR-Bank's long-term deposit rating and senior unsecured debt rating, our LGF analysis considers the combination of the bank's junior deposits, its outstanding debt volume and the amount of debt subordinated to this. This has resulted in a Preliminary Rating Assessment (PRA) of two notches above the BCA, reflecting very low loss-given-failure. For junior securities issued by SpareBank 1 SR-Bank, our LGF analysis confirms a high level loss-given-failure, given the small volume of debt and limited protection from more subordinated instruments and residual equity.

Government support

SpareBank 1 SR-Bank has a sound franchise in the county of Rogaland, south-west Norway, with a 35% market share. The bank has also expanded into neighbouring counties, but its national market share in lending is around 4-5%. Therefore, we expect a moderate probability of government support for debt and deposits, resulting in one additional notch of rating uplift. However, the implementation of an official resolution regime in Norway in the coming months, might cause us to reconsider/lower our government support assumptions for all rated savings banks in Norway, including SpareBank 1 SR-Bank, which also drives our negative outlook.

For the bank's junior securities, we continue to consider that potential government support is low and these ratings do not include any related uplift. Junior securities also include additional downward notching from the BCA reflecting coupon suspension risk ahead of a potential failure.

We intend to reassess our government support assumptions for all Norwegian savings banks, including SpareBank 1 SR-Bank, following the enactment of a relevant local legislation for the implementation of an official resolution regime. The new legislation is aligned with the EU's bank recovery and resolution directive (BRRD) and will come into force from January 2019.

Counterparty Risk Assessment

CR Assessments are opinions of how counterparty obligations are likely to be treated if a bank fails and are distinct from debt and deposit ratings in that they (1) consider only the risk of default rather than the likelihood of default and the expected financial loss suffered in the event of default and (2) apply to counterparty obligations and contractual commitments rather than debt or deposit

instruments. The CR Assessment is an opinion of the counterparty risk related to a bank's covered bonds, contractual performance obligations (servicing), derivatives (e.g., swaps), letters of credit, guarantees and liquidity facilities.

SpareBank 1 SR's CR Assessment is positioned at Aa3(cr)/Prime-1(cr)

SpareBank 1 SR-Bank's CR Assessment is positioned at Aa3(cr)/Prime-1(cr), four notches above the bank's adjusted BCA of baa1, based on the substantial cushion against default provided to the senior obligations represented by the CRA by subordinated instruments, along with one notch of government support. The main difference with our Advanced LGF approach used to determine instrument ratings is that the CRA captures the probability of default on certain senior obligations, rather than expected loss, therefore we focus purely on subordination and take no account of the volume of the instrument class.

Counterparty Risk Ratings (CRR)

Counterparty Risk Ratings are opinions of the ability of entities to honour the uncollateralized portion of non-debt counterparty financial liabilities (CRR liabilities) and also reflect the expected financial losses in the event such liabilities are not honoured. CRR liabilities typically relate to transactions with unrelated parties. Examples of CRR liabilities include the uncollateralized portion of payables arising from derivatives transactions and the uncollateralized portion of liabilities under sale and repurchase agreements. CRRs are not applicable to funding commitments or other obligations associated with covered bonds, letters of credit, guarantees, servicer and trustee obligations, and other similar obligations that arise from a bank performing its essential operating functions.

SpareBank 1 SR-Bank's CRR is positioned at Aa3/Prime-1

The CRR, prior to government support, is positioned three notches above the adjusted BCA of baa1, reflecting the extremely low loss given failure from the high volume of instruments that are subordinated to CRR liabilities. The bank's CRR benefits from one notch of rating uplift based on government support, in line with our assumptions on senior debt and deposits.

Foreign currency debt rating

SpareBank 1 SR-Bank's foreign-currency debt rating of A1 is unconstrained given that Norway has a country ceiling of Aaa.

About Moody's bank Scorecard

Our Scorecard is designed to capture, express and explain in summary form our rating committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our Scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The Scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

CREDIT RATINGS ISSUED BY MOODY'S INVESTORS SERVICE, INC. AND ITS RATINGS AFFILIATES ("MIS") ARE MOODY'S CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MOODY'S PUBLICATIONS MAY INCLUDE MOODY'S CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS AND MOODY'S OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. CREDIT RATINGS AND MOODY'S PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. NEITHER CREDIT RATINGS NOR MOODY'S PUBLICATIONS COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS AND PUBLISHES MOODY'S PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS OR MOODY'S PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER. ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing the Moody's publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$2,700,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY250,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
